and the Final Office Action of February 27, 2007

IN THE ABSTRACT

Please delete the current Abstract in its entirety and
substitute therefor the enclosed New Abstract.

NEW ABSTRACT

A depilating apparatus includes a housing that contains a supply of a depilating tape, and a heating device for heating the depilating tape. An application roller is provided for applying the heated depilating tape to the skin of a person. In addition, a wind-up reel is provided for winding up depilating tape that has already been used, and a motor for driving the wind-up reel.
